

The purpose of this document is to inform you that **NOA·AD** has implemented an Integrated Quality and Environmental Management System based on the reference standards **UNE-EN-ISO 9001:2015** and **UNE-EN-ISO 14001:2015**.

Therefore, you are subject to periodic control and monitoring consisting of the identification and assessment of possible incidents related to the service provided.

Here are the minimum requirements to be applied in reference to the provision of your services in environmental matters.

TYPE OF SUPPLIER		SUBCONTRACTED CONSTRUCTION WORK		
ASPECTOS AMBIENTALES				
WASTE	SPILLAGE	EMISSIONS	UTILITIES	OTHER
SCRAPS, CONSTRUCTION AND DEMOLITION, CARDBOARD/PAPER, PLASTIC, CONTAMINATED EMPTY CONTAINERS, SPRAYS, ABSORBENTS, ...	---	DUST NOISE EMISSIONS VEHICLES/ MACHINERY	WATER ELECTRICITY GAS-OIL RAW OR AUXILIARY MATERIALS	--
GENERAL REQUIREMENTS				
<p>To be aware of and comply with current national, regional, and local legislation applicable to your activities, products, and services in environmental and other matters.</p> <p>To commit to the fulfillment of the environmental requirements included in this document.</p> <p>If you have a certified Environmental Management System, you shall inform <b>NOA·AD</b>, by sending us a copy of your current ISO 14001 certificate or EMAS registration.</p>				
ENVIRONMENTAL REQUIREMENTS				
<p><b><u>RESIDUES</u></b></p> <ul style="list-style-type: none"><li>• To remove the waste generated in the construction works and manage them according to the environmental legislation in force, unless authorized by <b>NOA·AD</b>.</li><li>• To have technical and safety information on the storage and handling of chemical products used in the works.</li><li>• It is forbidden to abandon waste or dump it in an uncontrolled manner on the ground, drains, sewers or watercourses.</li><li>• Waste must be sorted selectively as soon as it is produced.</li><li>• Each type of waste must be stored appropriately. Containers, sacks, bags or collection systems should be used to prevent their dispersion.</li><li>• The procurement of chemicals must be done with minimum environmental impact.</li><li>• The area where the containers are placed should be signposted and identified.</li><li>• To close the containers once they have been used and to keep them in a good state of conservation.</li><li>• To avoid, as far as possible, overpackaged and disposable products.</li><li>• In the case of hazardous waste, it should be delivered to a carrier and manager authorized according to current legislation.</li><li>• Work areas should be kept clean and tidy at all times.</li><li>• You must be responsible for the storage and management of the waste generated by your work, handing it over to an authorized manager and following at all times what is indicated by the legislation in force.</li></ul>				
<p><b><u>EMISSIONS AND NOISE</u></b></p> <ul style="list-style-type: none"><li>• To adopt the necessary preventive measures to avoid or minimize acoustic emissions and emissions of dust and suspended particles during the supply of the service.</li><li>• Vehicles used in the course of the construction work must have passed the official technical inspection.</li><li>• Proper preventive maintenance of equipment and machinery.</li><li>• To disconnect/switch off appliances/equipment when not in use.</li></ul>				

**SPILLAGE**

- Uncontrolled dumping of concrete waste in the vicinity of the construction site is prohibited. Concrete mixers must be washed at the subcontractor's facilities. If this is not possible, it must be done in a suitable place that complies with current legislation. If a concrete mixer washing basin has been set up on the site, it must be used in accordance with the established conditions of use.
- The dumping of any hazardous substance is strictly forbidden. When it is believed that a spill may occur, NOA·AD must be informed.

**UTILITIES**

- **ELECTRICITY**  
To use electricity when sunlight is not sufficient.  
To turn off electrical equipment and lights when they are not necessary.
- **WATER**  
To turn off the faucets correctly.  
Do not let the water run when not in use.

**EMERGENCIES**

- Accidental spills of hazardous substances should be collected with absorbent material and subsequently treated as hazardous waste.
- Report any accident or environmental emergency immediately to NOA·AD.

**ENVIRONMENTAL CONTROL**

During the development of the construction works, the person in charge assigned by NOA·AD will monitor the correct fulfillment of the environmental requirements demanded in this document.
